

BAGS FOR MEDICAL AND PHARMACEUTICAL APPLICATIONS

BAGS FOR MEDICAL AND PHARMACEUTICAL APPLICATIONS

A HIGHLY SPECIALIZED AND BROAD PRODUCT RANGE

A specialized, widely consolidated know-how, and continuous research, enables Haemopharm to produce different types of bags with extremely high standards; from standard sized bags, made to contain infusion and dialysis solutions, to bags specially made for purposes such as nutrition, washing, blood and tissue preservation, pharmaceutical gels and powders, antibiotics, as well as bags suitable for cryopreservation and inert to gas for ozonotherapy.

A CONSTANT AND STRONG COMMITMENT TO SELECTING THE BEST RAW MATERIALS

Haemopharm uses materials which are exclusively certified by the biggest international pharmacopoeias: USP, BP, EP, JP, and produced by the leading companies in the industry.

The materials used for the bags' production are: PVC, PP (multi-layer), EVA, POLYURETHANE.

ALL PRODUCTION STAGES ARE IN FULL COMPLIANCE WITH THE MOST STRICT PROCEDURES

All the production procedures are examined and qualified by the client companies with periodic audit systems and are carried out in Clean rooms and a controlled environment of different classifications according to the ISO 14644-1-2-3-4-5-6-7 regulations.

Haemopharm is certified by UNI EN ISO 9001:2008 and UNI EN ISO 13485:2007; its first certification was achieved in 1998.
